Algiers, Algeria

EDUCATION

- University of Algiers 1 – Department of Architecture** Algiers, Algeria
Bachelor's Degree (Licence) in Architecture September 2021 - July 2024
Academic Performance: GPA 14/20 (Good Standing)
Core Curriculum: Architectural design fundamentals, building technology, history of architecture, urban morphology, structural engineering, and computer-aided design (CAD).
- University of Algiers 1 – Department of Architecture** Algiers, Algeria
Master's Degree in Architecture – Environmental Architecture & Technologies September 2024 - July 2026
Main focuses: Parametric architecture, biomimetic envelopes, building performance simulation, environmental optimization, algorithmic design
Academic Performance: GPA 17/20 (Graduated with Honors / Excellence) – Ranked 8th out of 296 students top 2.7%.
Master's Thesis: Performance-driven parametric envelopes inspired by biological spiral patterns, integrating microclimate and hygrothermal simulations using Grasshopper, Ladybug Tools, and WUFI.

RESEARCH INTERESTS

- Parametric & Algorithmic Architecture / Machine Learning Workflows for Microclimate Control / Hygrothermal Optimization of Envelopes / Biophilic & Biomimetic Design / Building Performance Simulation (BPS).

SKILLS SUMMARY

- CAD & BIM Software:** AutoCAD, Revit, Archicad, SketchUp, Rhinoceros 3D
- Parametric & Simulation:** Grasshopper (GH Python), Ladybug Tools, Honeybee, WUFI (Hygrothermal Analysis)
- Rendering & Visualization:** D5 Render, Lumion, Photoshop, Illustrator, InDesign
- Programming & Technical:** LaTeX, Scripting for Algorithmic Geometry
- Languages:** French (Full Professional Fluency), English (Professional Working Proficiency), Arabic (Native)
- Soft Skills:** Leadership, Architectural Design, On-Site Construction Supervision, Interdisciplinary Collaboration, Public Speaking, Technical Writing, Time Management

EXPERIENCE

- Private Architecture Consultancy / Régie Foncière** Algiers, Algeria
Architectural Intern – Site Supervision & Rehabilitation 1 Year
 - Role:** Assigned to direct site supervision and structural rehabilitation of historical buildings across downtown Algiers (Algiers Centre).
 - Technical Expertise:** Diagnosed structural pathologies on site; supervised complex structural alterations including timber floor replacements, structural metal modifications, and masonry vault consolidations.
 - Impact:** Gained comprehensive expertise in structural rehabilitation, heritage building techniques, and real-time site problem-solving.
- CNIC (National Center of Engineering for Construction)** Algiers, Algeria
Architectural Intern 5 Months
 - Role:** Developed conceptual designs and preliminary architectural proposals (esquisse) for public and institutional infrastructure projects.
 - Key Projects:** Designed an officers' and non-commissioned officers' mess/accommodation facility and a public library project. Designed schemes were formally selected and adopted for development.
 - Tools:** AutoCAD, Rhinoceros 3D, 3D modeling, and architectural rendering.
- SONATRACH** Algiers, Algeria
Architectural Intern – Site Supervision 5 Months
 - Role:** Participated in on-site construction monitoring and architectural supervision for the construction of Sonatrach's new corporate headquarters.
 - Key Tasks:** Monitored execution compliance, verified architectural detail implementation, and inspected large-scale structural and finishing works.
